

RegularExpressionAttribute

```
classDiagram
    class RegularExpressionAttribute
    class AnyTestClientAuthenticationContainsLowCaseAttribute["AnyTest.ClientAuthentication.ContainsLowCaseAttribute"]
    AnyTestClientAuthenticationContainsLowCaseAttribute --|> RegularExpressionAttribute
```

The diagram illustrates an inheritance relationship. At the top is the 'RegularExpressionAttribute' class, represented by a white box with a black border and three horizontal sections. The top section contains the class name. Below it is the 'AnyTest.ClientAuthentication.ContainsLowCaseAttribute' class, represented by a gray box with a black border and three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the method signature '+ ContainsLowCaseAttribute()'. A blue arrow with an open triangular head points from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.

AnyTest.ClientAuthentication.
ContainsLowCaseAttribute

+ ContainsLowCaseAttribute()
